Applicants response filed 4/2/07, to the restriction requirement mailed 3/1/07, has been received. Group I has been elected without traverse. Upon further consideration, an election of species is required in the Elected Group I as follows.

This application contains claims directed to the following patentably distinct species:

Species I, wherein the food is contacted/treated with an ED composition and then filled into the container,

Species II, wherein the food is filled into the container and then contacted/treated with an ED composition in the container

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is seen to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Art Unit: 1761

To expedite prosecution, in view of the plethora of references cited by applicant, and in view of the fact that none of the references were discussed in the specification in a background section of the specification, nor any admissions of prior art were made, and in an effort to avoid any key reference from being overlooked in such a large stack of references, applicant is invited to point out which, if any, references are deemed to be less peripheral and more pertinent to the claimed invention.
